Experiment-1

Write a program for Tokenization

```
[ ]  text='I\'11 be with you during your stay in M.P.'
print(text)

[ ]  ... I'11 be with you during your stay in M.P.

[ ] import re
word=re.split(r'\W+',text)

[ ] print(word)

[ ]  ['I', '11', 'be', 'with', 'you', 'during', 'your', 'stay', 'in', 'M', 'P', '']

[ ] import nltk

[ ] nltk.download('punkt')

[ ]  [nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data] Unzipping tokenizers/punkt.zip.
True

[ ]  import nltk
from nltk import tokenize as tk
nltk.download('punkt_tab')
a="I am vaishnavi"
print(tk.word_tokenize(a))

[ ]  ... ['I', 'am', 'vaishnavi']
[nltk_data] Downloading package punkt_tab to /root/nltk_data...
[nltk_data] Package punkt_tab is already up-to-date!
```

```
import string
import re
import nltk
nltk.download('punkt')
from nltk import word_tokenize, sent_tokenize
from nltk.corpus import stopwords
#load data
text="The Quick Brown Fox jumps over the Laxy dog!. Can you come with me please"
#split into words
print("Sentence Tokenization")
sentences=sent_tokenize(text)
print(sentences)
print("Word Tokenization")
tokens=word_tokenize(text)
print(tokens)
```

```
Sentence Tokenization
['The Quick Brown Fox jumps over the Laxy dog!.', 'Can you come with me please']
Word Tokenization
['The', 'Quick', 'Brown', 'Fox', 'jumps', 'over', 'the', 'Laxy', 'dog', '!', '.', 'Can', 'you', 'come', 'with', 'me', 'please']
[nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data] Package punkt is already up-to-date!
```

[38]

0s

```
a="He ran 5 km is 8 minutes."
print(word_tokenize(a))
```

⌵

['He', 'ran', '5', 'km', 'is', '8', 'minutes', '.']

[11]

0s

```
s = "I am pursuing a 4-year B.Tech (AIML) program."
b = ""

for i in s:
    if i.isalpha() or i == " ":
        b = b + i

print(b)
```

⌵

I am pursuing a year BTech AIML program
